SUMMARY

Software developer with a Computer Engineering background and hands-on experience building and maintaining software for industrial automation in the Operational Technologies department of a large steel manufacturer. Works across the stack — from Go and ASP.NET MVC back ends to React, Next.js and Astro front ends — and ships with Docker and Git. Enjoys turning complex, real-world systems into clear and reliable software.

TECHNICAL SKILLS

Languages	Go, Python, C, JavaScript, HTML, CSS
Frameworks	ASP.NET MVC, React, Next.js, Astro
Tools & DevOps	Docker, Git, GitHub, Vercel
Foundations	Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Architecture

EXPERIENCE

Intern, Operational Technologies — Kardemir A.Ş. 07.2025 – 09.2025
Karabük, Türkiye

- Developed, debugged and maintained software for industrial automation and device control systems.
- Performed system testing and supported hardware–software integration in a large-scale manufacturing environment.
- Collaborated with multidisciplinary engineering teams to optimize operational workflows.

PROJECTS

Personal Portfolio Website — Astro, TypeScript, GSAP, Lenis 2026

- Designed and built a responsive portfolio site from scratch, from visual design to deployment.
- Managed project content with Astro Content Collections and a typed schema that validates every entry at build time.
- Implemented scroll-driven animations with GSAP ScrollTrigger and smooth scrolling with Lenis, respecting reduced-motion preferences.
- Set up continuous deployment from GitHub to Vercel.

EDUCATION

B.Sc. Computer Engineering — Karabük University 09.2021 – 07.2026
Karabük, Türkiye · Curriculum delivered 30% in English

LANGUAGES

Turkish — Native **English** — Upper-intermediate (B2)
