SUMMARY

Software developer with a Computer Engineering background who built and runs ajansdukkani.com, a production platform with user accounts, real-time messaging and a moderated agency directory covering all 81 provinces of Türkiye. Experienced with Next.js, React, TypeScript and Firebase, with additional work in Go, ASP.NET MVC and Docker, and hands-on exposure to industrial automation software from an internship in operational technologies. Combines engineering with a strong visual sense from professional photography and video work.

TECHNICAL SKILLS

Programming	TypeScript, JavaScript, Go, Python, C, HTML, CSS
Frameworks	Next.js (App Router), React, ASP.NET MVC, Astro
Backend & Cloud	Firebase (Authentication, Cloud Firestore, Admin SDK, App Hosting), REST APIs, Resend
Tools & DevOps	Git, GitHub, Docker, Vercel, CI/CD (push-to-deploy)
Spoken	Turkish (native), English (upper-intermediate, B2)
Foundations	OOP, Data Structures & Algorithms, Databases, Operating Systems, Computer Networks, Software Architecture

EXPERIENCE

Web Developer & Content Producer — Ajans Dükkanı — 09.2024 – Present

Karabük, Türkiye

- Built and maintain the company's platform, ajansdukkani.com (see Projects).
- Produce photography, video and edited content for clients, from shooting through post-production to delivery.

Intern, Operational Technologies — Kardemir A.Ş. — 07.2025 – 09.2025

Karabük, Türkiye

- Developed, debugged and maintained software for industrial automation and device control systems.
- Performed system testing and supported hardware–software integration in a large-scale manufacturing environment.
- Collaborated with multidisciplinary engineering teams to optimize operational workflows.

PROJECTS

ajansdukkani.com — Next.js, React, TypeScript, Firebase — ajansdukkani.com

- Directory platform connecting clients with production, social media and design agencies, filterable by service, province and district.
- Implemented email/password and Google sign-in with Firebase Auth, plus a custom email verification flow: 6-digit codes stored as SHA-256 hashes, with expiry, resend cooldown and attempt limits.
- Designed the Firestore data model and security rules: owner-only editing, admin-only publishing, contact details split into a separately protected document, and messages readable only by participants.
- Built real-time messaging with read receipts, reviews and ratings, an agency approval workflow and an admin panel.
- Implemented KVKK-compliant consent flows and a cookie banner that loads analytics only after opt-in; added per-page SEO metadata, a sitemap and auto-generated Open Graph images for each agency.
- Wrote all styling and animations in custom CSS with a minimal dependency footprint; deployed via Firebase App Hosting on every push.

Personal Portfolio Website — Astro, TypeScript, GSAP, Lenis — 2026

- Designed and built a responsive portfolio site with typed Astro Content Collections, GSAP scroll animations and continuous deployment to Vercel.

EDUCATION

B.Sc. Computer Engineering — Karabük University — 09.2021 – 07.2026

Karabük, Türkiye · Curriculum delivered 30% in English
